Performance quoted represents past performance and does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the funds may be lower or higher than the performance quoted. Investment performance reflects fee waivers in effect. In the absence of such waivers, total return would be reduced. To obtain the performance of the funds as of the most recently completed calendar month, please visit www.partnerselectfunds.com.

The performance quoted does not include a deduction for taxes that a shareholder would pay on distributions or the redemption of fund shares.

The fund will invest in foreign securities. Investing in foreign securities exposes investors to economic, political and market risks and fluctuations in foreign currencies. Though not a small-cap fund, the fund may invest in the securities of small companies. Small-company investing subjects investors to additional risks, including security price volatility and less liquidity than investing in larger companies. Investments in emerging market countries involve additional risks such as government dependence on a few industries or resources, government-imposed taxes on foreign investment or limits on the removal of capital from a country, unstable government and volatile markets. Multi-investment management styles may lead to higher transaction expenses compared to single investment management styles. Outcomes depend on the skill of the sub-advisors and advisor and the allocation of assets amongst them.

Diversification does not assure a profit or protect against a loss in a declining market.
